Name of applicant.

Battle Mountain, County of Lander

State of Nevada, hereby make application for permission to appropriate the public waters of the State of Nevada, as hereinafter stated. (If applicant is a corporation give date and place of incorporation.) _____

1. The source of the proposed appropriation is Buck Spring
Name of stream, lake, or other source.
2. The amount of water applied for is all that may be developed one half and / second-feet.
One second-foot equals 40 miners' inches.
3. The water to be used for Irrigation and domestic
Irrigation, power, mining, manufacturing, domestic, or other use.
4. The water is to be diverted from its source at the following point: whence to $\frac{1}{4}$ cor. S.Bdy. Sec. 34, T. 29 N.R. 40 E M.D.M. Bears
Describe as being within a 40-acre subdivision of public survey, or by course and distance to a section corner. If on unsurveyed land it should be so stated.
N. 55° 40' W. 1048 ft.

IF THE WATER IS TO BE USED FOR IRRIGATION, SUPPLY THE FOLLOWING INFORMATION:

- (a) Number of acres to be irrigated is 160
- (b) Description of land to be irrigated S $\frac{1}{2}$ S.E. $\frac{1}{4}$ Sec. 34, S $\frac{1}{2}$ SW. $\frac{1}{4}$ Sec. 35, T. 29 N.R. 40 E. M.D.B. & M.
Describe by legal subdivision, or if on unsurveyed land it should be so stated and a description provided in accordance with special instruction from the State Engineer when application is returned for correction.

- (c) Irrigation will begin about March 1st and end about Nov. 1st
Month.

IF WATER IS TO BE USED FOR POWER, MINING, TRANSPORTATION, OR OTHER USE, SUPPLY THE FOLLOWING INFORMATION:

- (d) Power to be developed is _____ horsepower.
- (e) Works to be located whence to $\frac{1}{4}$ cor. S.Bdy Sec. 34 T 29 N.R. 40 E. M.D.M. Bears N 55° 40' W 1048 ft.
Give 40-acre subdivision on which works will be located, or locate by course and distance to a section corner.
- (f) Point of return of water to stream No
Describe in same manner as point of diversion.

- (g) Remarks The flow of Buck Spring does not exceed $\frac{1}{2}$ in. at this present date Sept. 18 - 1918. The proposed method of development is by open cut and tunnel.

DESCRIPTION OF PROPOSED WORKS

Open cut and tunnel- Ditch, Pipe and Flume

State manner in which water is to be diverted, whether by dam or other works, whether through pipes, ditches, flumes, or other conduits. If water

is to be stored in reservoirs it should be so stated and the location of the reservoir should be given with reference to the legal subdivisions.

5. Estimated cost of works \$1000⁰⁰
6. Estimated time required to construct works Three Years
7. Remarks

For use of applicant.

APPROVAL OF STATE ENGINEER

This is to certify that I have examined the foregoing application, and do hereby grant the same, subject to the following limitations and conditions:

The amount of water to be appropriated shall be limited to the amount which can be applied to beneficial use, and not to exceed 1.6 cubic feet per second.

Actual construction work shall begin on or before June 22, 1921

Proof of commencement of work shall be filed before July 22, 1921

Work must be prosecuted with reasonable diligence and be completed on or before June 22, 1924

Proof of completion of work shall be filed before July 22, 1924

Application of water to beneficial use shall be made on or before June 22, 1926

Proof of the application of water to beneficial use must be filed with State Engineer on or before July 22, 1926

WITNESS MY HAND AND SEAL this 22nd day of January 1921

Proof of labor filed MAY 14 1921

Map filed June 28, 1921

Withdrawn by applicant OCT 24 1935

Alfred Merritt
By C.B.

J. G. Sangham
State Engineer.

This permit is issued subject to all prior rights on the source, and in conjunction with permit No. 5260, both of which describe the same land as proposed to be irrigated. The amount of water herein granted is placed at five tenths (0.5) of a cubic foot per second for a portion of the land proposed to be irrigated, notwithstanding the fact that such land is granted a full water right under permit No. 5260 from Blue Lead Creek, so that such amount of water may be diverted from the source herein described and used in the event that there is a shortage of water in the source described under permit No. 5260. However, the total amount of water used at any time from both sources named in the two permits shall not exceed the statutory allowance of 1.6 cubic feet of water per second for the maximum area of 160 acres of land described in the two permits. The applicant will be required, at the time of filing proof of beneficial use of water, to definitely segregate the areas of land which obtain water for irrigation purposes from each of the sources described in the two permits, so that certificates can be issued for the land to which the water of each source is appurtenant. A substantial headgate and weir must be installed and maintained at or near the point of diversion to facilitate the measurement and control of water. The State reserves the right to regulate the use of the water herein granted at any and all times. It is distinctly understood that applicant agrees to the conditions herein contained.
